Roll a Picasso Pirate Directions

1. Fold the paper in 1/2 horizontally and vertically, then open back up the paper. (DIAGRAM A)

2. Roll your die and then look on the "Roll a Picasso Pirate" chart. This will determine which face shape you will draw. For example, if your die shows 6 that is the face shape you will draw. When you draw the face shape on your paper you will want to leave some room at the top for the pirate bandana that will be drawn later on the top of the head. Also leave some room at the bottom if you want to draw a neck and part of the striped pirate t-shirt. Also you will want to try to center the face on the paper so that it falls within the 4 rectangles that were created when you folded the paper. (DIAGRAM B)

3. Repeat the process by rolling the die for each face part (Rolls 2-7 on the "Roll a Picasso Pirate" chart) to determine which left eye, nose, mouth, mustache, ear options to draw on your paper. STOP after you have completed Roll 7 and drawn the right ear.

4. Before Roll 8, draw the pirate bandana at the top of the head. The shape of the bandana is like a half circle. For the side ties of the bandana, draw two bunny ear or flower petal like shapes. You can either choose to put those on the right or left side.

5. After you have drawn the pirate bandana, roll your die to determine what pattern option you should draw on the bandana.

6. Finish your pirate by drawing an eye patch on the pirate's face, adding scars to his face, adding beard stubble to the pirates face, and an earring to the one of the ears. You can also draw a neck and part of the pirate striped shirt

7. Use your black sharpie or pen to trace over your drawing and also the folded lines on your paper (DIAGRAM C). Finally, color your pirate.
